

# JOIN THE GROWING ANTI-VIVISECTION MOVEMENT IN SOUTH FLORIDA

Experiments on living animals ("vivisection") are cruel, wasteful and morally indefensible. South Florida SMASH HLS believes animals deserve to live free from suffering, confinement and abuse. Help us fight for animals imprisoned inside laboratories.

## OUR CAMPAIGNS

**Huntingdon Life Sciences (HLS)** is one of the world's largest animal-testing labs. It operates facilities in England and in the U.S. Every day an average of 500 animals – including dogs, cats, mice, primates and rabbits – die inside HLS.

**Primate Products, Inc.** is a disgusting company in Florida that imports and breeds monkeys for use in research and testing. Primate Products sells live monkeys to universities, the U.S. military and to notorious companies like HLS.

**The international trade in monkeys** causes intolerable cruelty. A small number of airlines continue to transport monkeys for the research industry, animals destined to be used in painful experiments during which most will die. Help us stop the monkey flights!
